

## **STOP MAC Mojave Automatic adding of programs to DOCK**

To the many frustrated people out there finding their menu take up the whole screen with recently opened programs here is your solution.

### **THE FIX**

Go to (? > System Preferences > Dock)

From there you will see lots of options to customise your Dock, personally I would suggest having a play around and really see whats under the bonnet of your version of MAC OS.

### **SOLUTION**

The options you are after is (Show recent Applications in Dock), if you turn this off hey presto, no more pesky program being added to the Dock / Menu

### **PRO TIP**

use spotlight (CMD or command + Spacebar) and type Dock and enter for a fast way to edit your dock settings.
